

# EZ CALL

## SIMPLE WIRELESS SYSTEM

This simple wireless system provides an audible and visual alert in the Hoist. Weather proof Up, Down and Emergency call buttons wirelessly transmit a signal to the operators panel in the car via a Dell Rugged Touch Pad.

### WIRELESS

The system uses RF signals which transmit up to 500'. and provide uninterrupted communication between the call stations and the operators display inside the Hoist car.

### COST EFFECTIVE

This entry level system is perfect for single and dual car configurations. It offers visual and audible directional alerts to the operator in the hoist and notifies Emergency Calls.

### WEATHER PROOF

The operators Tablet is a Military grade Dell Touch screen, weatherproof and tolerant of extreme temperature conditions.

### USER-FRIENDLY

Our programming was created with you in mind, making it easy to get started. Our team is happy to configure your original system, and will educate you for when it comes time to set-up your next project.

## ADDITIONAL FEATURES

- 500' range with standard floor set. Amplifiers improve signal strength to 1,500'+
- Configure for up to 30 floors
- Installs on ANY type of Hoist, requires 110v power
- Efficiency improves the minute you install it
